OGC Has Reviewed

MEMORANDUM FOR: Secretary, Executive Advisory Group

FROM:

Assistant General Counsel

SUBJECT : Response to IG Recommendation

1. This memorandum is in response to Recommendation 11 of the Inspector General's report on Agency Relations with the U.S. Business Community.

2. Recommendation 11 reads as follows:

That OGC, as an appropriate central repository, prepare a status report on DCI delegations of contracting authority to the Office of Personnel, OL, and others, including national program contracting officers; and that the bases for these delegations be reviewed by a senior management group such as the EAG for whatever revision may seem appropriate.

3. Attached are two tables summarizing the contracting authority which is pertinent to this recommendation. They are arranged in outline form, to reflect redelegation of authority. Each sublevel in the outline indicates a redelegation of authority from the level just above. Table I reflects the status within the Directorate of Administration. Table II shows the status within the Directorate of Science and Technology, differentiating between CIA programs and national programs. Accompanying these summary tables is a complete copy of the supporting data supplied by DDA and DDS&T.

4. As for this Office being "an appropriate central repository," OGC does not now maintain a central file of all delegations of authority within the Agency, and that in itself may be an appropriate topic for EAG consideration. We are retaining a copy of the background materials attached to this memorandum.
